MY PROFILE

Hello, I am MD. Enamul Hossen. I'm a professional JavaScript developer with one year of experience specializing in modern web technologies, including React.js, Node.js, and Next.js. I am adept at building scalable, responsive, high-performance web applications with a strong focus on user experience and efficient backend services.

TECHNICAL SKILLS

❖   HTML5, CSS3
❖   Node js
❖   Mongo DB
❖   Next js
❖   Zustand

❖   JavaScript ES6
❖   Express js
❖   React js
❖   React Redux
❖   Mobile App UI Design - Figma

SOFT SKILLS

❖   Problem-Solving
❖   Creativity
❖   Networking

❖   Collaboration
❖   Active Listening

WORK EXPERIENCE

Full Stack Developer   2024 - Present

Freelancing | Project

o   Have already created several landing pages using React JS and Next JS.
o   Created a social media platform with the team. Here the UI has been created using react js, the API has been added using Axios and the state has been managed using Zustand.
o   In my e-commerce project, I developed a scalable and secure backend using Express.js. The backend managed user authentication, product management, order processing, and payment integration. I implemented JWT-based authentication and utilized MongoDB with Mongoose for data storage while enforcing security measures such as rate limiting and CORS.
